Nadine Adams is a Lecturer at Central Queensland University (CQU).

She graduated in Informatics from the University of Central Queensland in 2005 and obtained a Masters of Professional Education and Training from Deakin University in 2010.

In the role of lecturer in the Academic Learning Support Unit (ALSU) at CQU Nadine Adams teaches enabling mathematics to prepare non-traditional student for undergraduate entry.

Nadine is instrumental in enabling resource development within the ALSU Mathematics team. Present research interests include the use of technology, namely the tablet PC, to provide individualised assistance and personalised feedback to external students.

Nadine is interested in the causes of the worldwide mathematical deficit problem and co-authored and presented internationally on this topic.

She has also co-authored and presented several papers related to mathematics education, focusing on the transition of non-traditional university students.
