Dennis is an Educational Technology Officer at Educational Technology Division, Ministry of Education (MOE), Singapore. His job function includes areas in research and develop ICT-enabled pedagogies and implementation principles for sustainable and scalable applications to promote enriched learning experiences. Promote a culture of active experimentation and reflective practices on innovative use of ICT in education.

He joined the Teaching Service in 2003 after graduating with a Bachelor of Engineering degree from the University of New South Wales. He has a Masters in Education from Nanyang Technological University.

In his capacity, he manages The ICT Connection portal which charts the third Masterplan for ICT by MOE, seeking to enrich and transform the learning environments for students and equip them with the critical competencies and dispositions to succeed in a knowledge economy.

He is also involved as reviewer in international and local seminars and ICT-enriched pedagogical innovation projects, customise learning approaches in teacher training and ICT development to achieve educational goals.
