Advanced use of Learning Technologies in Higher Education

AduLeT - Advanced use of Learning Technologies in Higher Education

AduLeT wants to improve the teaching quality of lecturers by enhancing their skills concerning the use of technologies in an advanced way.

It also aims at training the lecturer on how a specific teaching method can be combined with a certain technology in addition to providing guidelines, best practice and strategy concepts for lecturers and universities.

As such the project will contribute to the modernization of Europe's Higher Education systems for education and training.
