The Cabinet of Ministers of the Republic of Uzbekistan, Tashkent, Uzbekistan

Abstract

Business communication skills play a crucial role in enhancing corporate governance and project management by fostering clear communication, teamwork, and strategic decision-making. Effective communication ensures transparency, efficiency, and accountability in business operations, contributing to successful project execution and governance. This study explores the significance of business English communication skills in entrepreneurship, investment projects, and economic development in Uzbekistan. It highlights how mastering business communication facilitates collaboration, negotiation, and leadership in both corporate and project environments. Additionally, the paper examines the role of digital transformation in business communication, emphasizing the growing importance of digital tools, remote collaboration, and multilingual communication in today's globalized economy. Uzbekistan's initiatives in fostering foreign language education and digital literacy are analyzed, showcasing their impact on business competitiveness and economic growth. The study underscores the necessity of continuous professional development in communication skills to adapt to evolving business landscapes and ensure sustainable corporate governance.

Keywords: *Business communication, corporate governance, project management, digital economy, business English, entrepreneurship, Uzbekistan.*

Introduction

Corporate governance and project management require effective communication skills to ensure transparency, accountability, and efficiency in decision-making processes. Over the years of independence, Uzbekistan has undergone significant economic transformations, prioritizing private sector development. The increasing importance of business communication skills is evident in the country's evolving economic landscape, where investment projects and entrepreneurship are central to economic growth. This paper examines how business communication skills contribute to successful corporate governance and project management, particularly in a digitally evolving business environment.

Literature Review

Business Communication in Corporate Governance

Effective corporate governance relies on communication strategies that ensure accountability, stakeholder engagement, and regulatory compliance. Studies indicate that communication competencies such as negotiation, public speaking, and business writing enhance decision-making and strategic planning [1,2].

The Impact of Business Communication on Project Management

The wide attraction of investments in the real sector of the economy, the increase in the potential and volume of exports of products, the positive balance of foreign trade turnover and the steady growth of gold and foreign exchange reserves with moderate volumes of external borrowings are an important factor in the implementation of structural transformations and diversification of the country's economy. People play an important role in the implementation and development of these processes. Because their behavior, their business and language skills have a positive impact on the development of the economy. Project management involves collaboration, problem-solving, and leadership, all of which are enhanced through strong communication skills. Research suggests that soft skills, including active listening,

persuasion, and teamwork, significantly impact project success [3]. Moreover, mastering business English enables professionals to participate in global business networks, fostering international collaboration [6].

The Digital Economy and Communication Skills

Uzbekistan has achieved important strategic goals in the real sectors of the economy - fuel and energy and grain independence. Consistent implementation of large-scale programs of modernization, technical and technological renewal of enterprises with the involvement of the most modern technologies for the deep processing of the richest mineral and agricultural resources of our country ensures the accelerated pace of development of such high-tech industries that are the locomotives for the development of our economy, such as energy, petrochemical, non-ferrous metallurgy, chemical and textile industry, mechanical engineering and automotive industry, pharmaceuticals and microbiology, high-quality and in-depth processing of agricultural products, production of building materials.[4,5]

The Decree of the President of the Republic of Uzbekistan dated October 5, 2020 «On approval of the strategy "Digital Uzbekistan - 2030" and measures for its effective implementation" № PD-6079 actively develops the digital economy in our country, in all sectors and fields, first of all, public administration. It is considered that comprehensive measures are being implemented for the wide introduction of modern information and communication technologies in education, health care and agriculture, and a number of measures are being implemented in order to "Increase the level of mastering of foreign languages by civil servants and to fill state bodies with highly qualified and competitive personnel" stated in part 7 of the Decree № PD -5117 of the President of the Republic of Uzbekistan dated May 19, 2021, "On measures to raise the popularization of learning foreign languages to a qualitatively new level"[7,8].

Methodology

This study employs a qualitative approach, analyzing policy documents, academic literature, and case studies on business communication and project management. Primary and secondary data sources were examined to identify the role of communication skills in governance and investment projects.

Findings and Discussion

Essential Business Communication Skills

Let's get to the most interesting part - an overview of the required skills for a business person. Below are the most popular and well-known skills that are required to increase the level of personal effectiveness (corporate employee, manager, entrepreneur, official).

There are two types of skills: soft-skills and hard-skills. The first are socio-psychological skills that are useful in most life situations: communication, leadership, command, public, "thinking" and others. The second is professional knowledge and skills: they will be needed at work and in the implementation of business processes. To develop skills, you need to choose the right tools (and not one, but two or three).

There are many different classifications of skills, and here, for ease of perception, competencies are divided into four main areas:

Basic communication skills that help develop relationships with people, maintain a conversation, and behave effectively in critical situations when communicating with others. Everyone needs these skills.

Self-management skills: help you effectively control your condition, time, processes.

Effective thinking skills: managing the processes in your head that help make life and work more systematic.

Management skills that people need at the stage when they become leaders of any business processes and entrepreneurs.

Business English Communication skill is a part of these skills set. Since many businesses now operate across international borders, learning Business English Communication skill allows listeners to succeed in global business with multilingual communication skills. At the same time, it is the combination of language and the skills [1, 2].

Business English in Corporate and Project Environments

Business English Communication skill helps us build on our existing English skills, improves our English proficiency, teaches additional essential skills in the business world Soft skills - communication (listening, persuasion and argumentation, networking, building and maintaining business relationships, negotiating, presentations, , self-presentation, public speaking, teamwork, focus on results, business writing, customer focus): self-management (emotion management, stress management, self-development management, planning and goal setting, time management, Energy / Enthusiasm / Initiative / Perseverance, Reflection,

Using feedback): thinking (systems thinking, creative thinking, structural thinking, logical thinking, information search and analysis, decision making and development, design thinking, tactical and strategic thinking (for managers): managerial skills (performance management, planning, setting tasks for employees, motivation, monitoring the implementation of tasks, mentoring (employee development) - mentoring, coaching, situational leadership and leadership, holding meetings, giving feedback, project management, change management, delegation), as well as introduces the technique of negotiation, the rules for conducting presentations, as well as correspondence, faxing, various requests, writing a resume. With the help of special phrases, students are taught the ability to convince business partners of the correctness of their point of view, the ability to defend it[1]. Their confident knowledge is practically one of the most important conditions for building a successful business, moving up the career ladder faster, unlike other employees who do not know English.

Training Methods for Business Communication Skills

Modern business education incorporates various teaching methodologies to enhance communication skills:

- **Communicative Method:** Interactive discussions, role-plays, and real-life simulations.
- **Audio-Lingual Method:** Listening exercises to improve pronunciation and fluency.
- **Immersion Method:** Scenario-based learning environments to boost practical application.
- **Online Learning:** Remote training sessions and self-paced courses tailored for professionals.[3]

Conclusion

Business communication skills are fundamental to corporate governance and project management. As Uzbekistan continues to modernize its economy, fostering communication competencies among professionals will enhance global competitiveness and economic development. Future research should focus on empirical studies assessing the direct impact of business communication training on organizational performance.
