

BODY COGNITION AND MATH EDUCATION FOR PRE-SCHOOL CHILDREN

Silvia Benvenuti Alessandra Renieri Ilaria Giancamilli

New Perspectives in Science Education - Florence 17-18 March 2016

our group

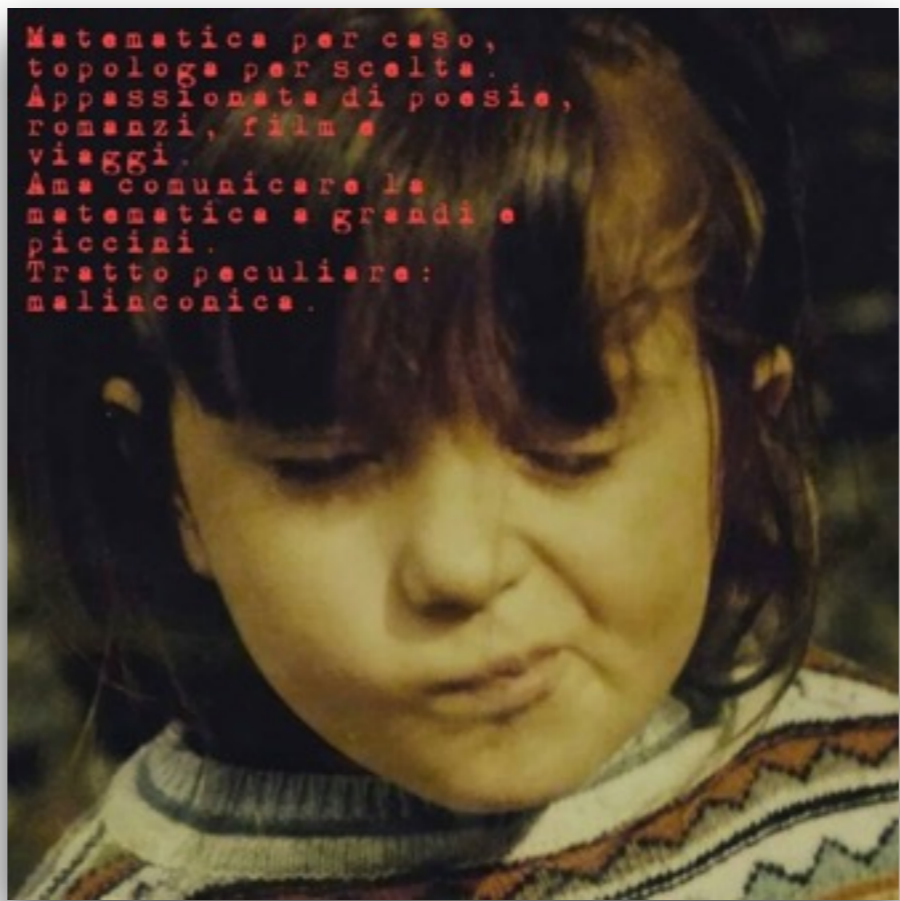

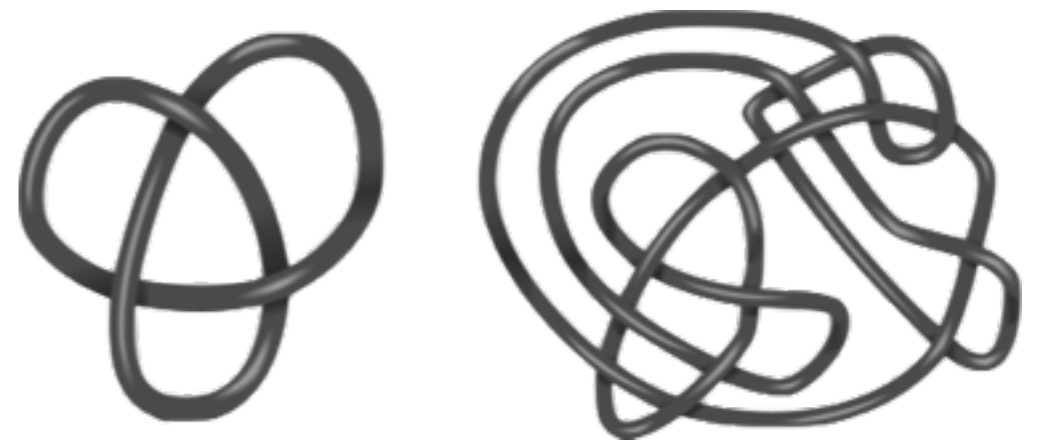

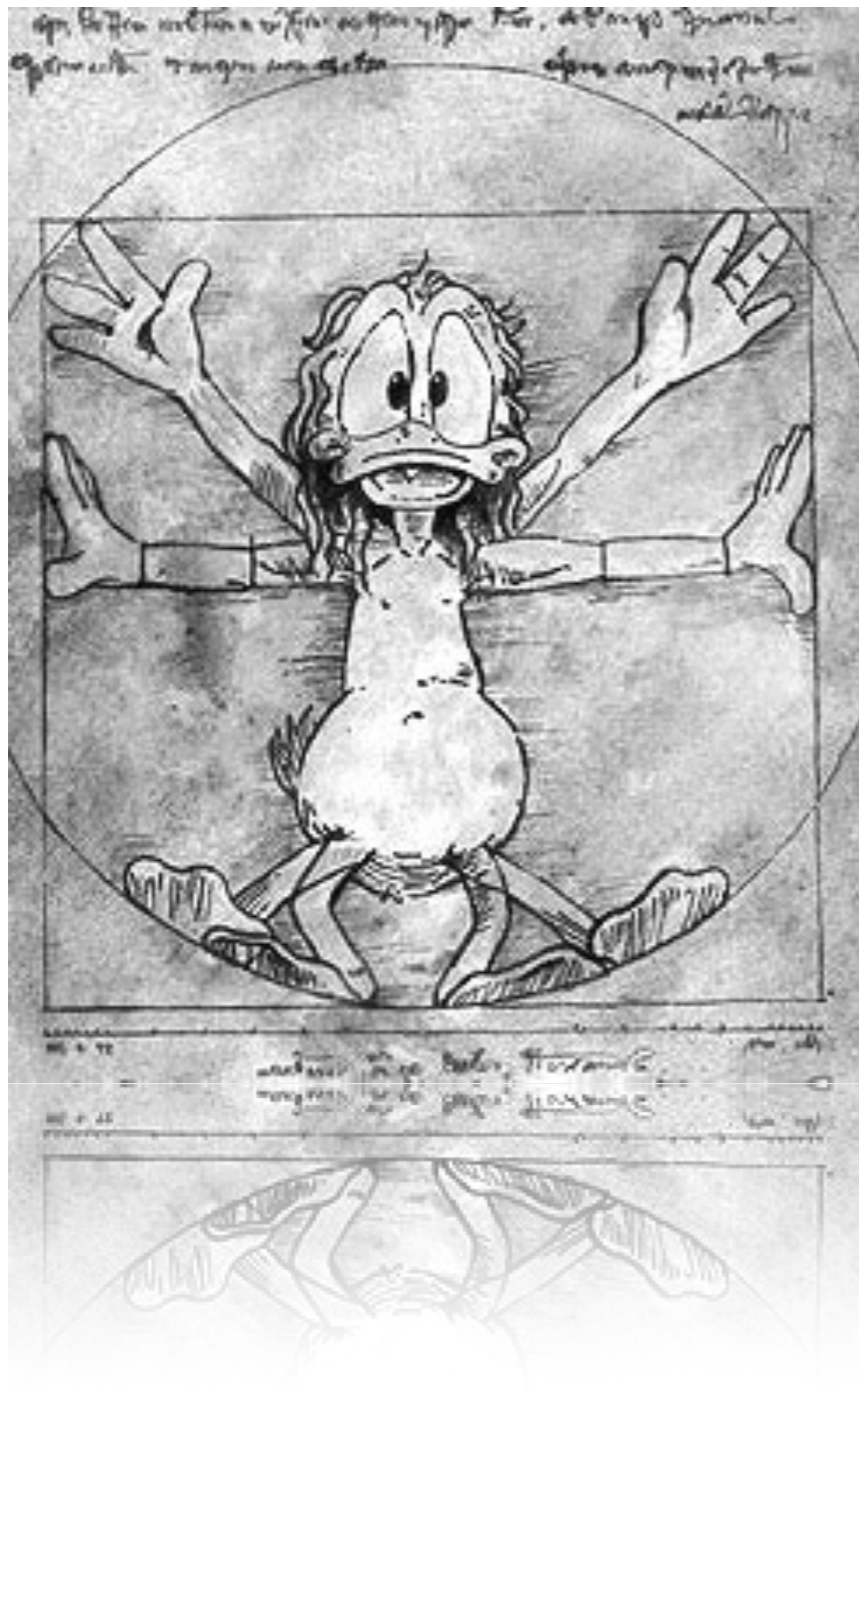

UNICAM Science
Outreach

Decisa a diventare
matematica fin dalla nascita,
balletta per diletto.
Appassionata di musica e arte,
ama condividere le sue idee
ed impressioni
con il mondo nel modo più
coinvolgente possibile.
Segni particolari: entusiasmo

Matematica per caso,
topologia per scelta.
Appassionata di poesia,
romanzi, film e
viaggi.
Ama comunicare la
matematica a grandi e
piccini.
Tratto peculiare:
malinconica.

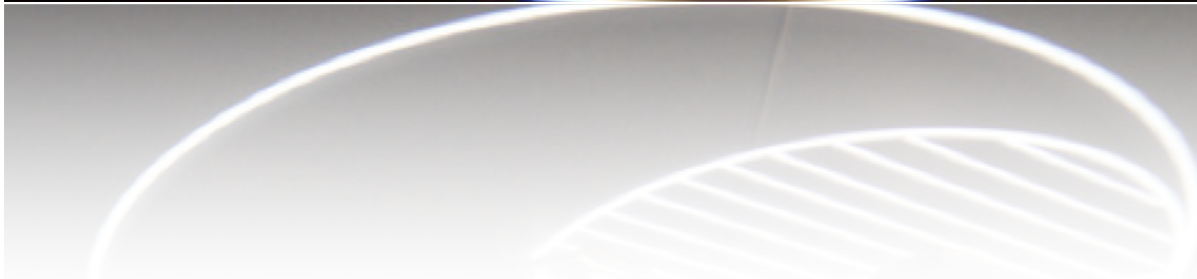

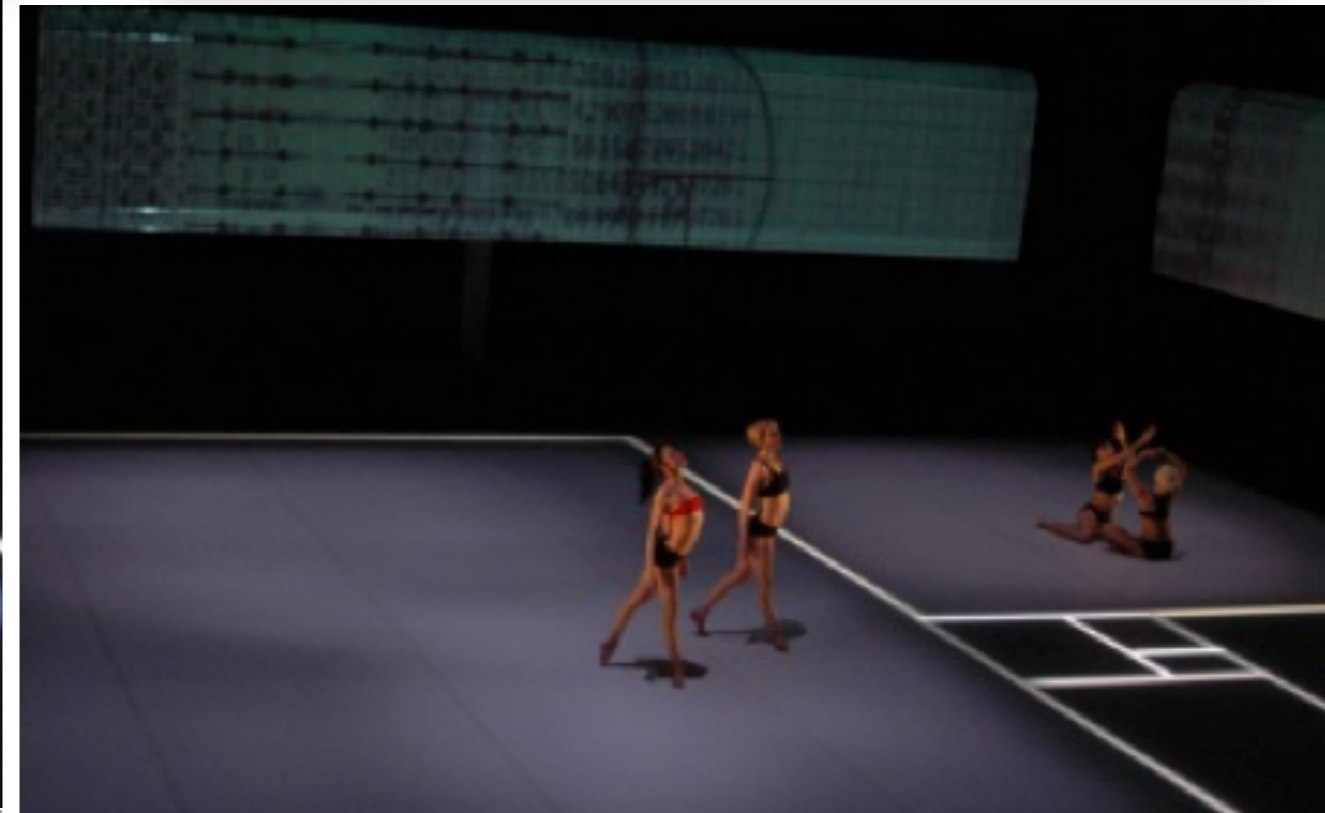

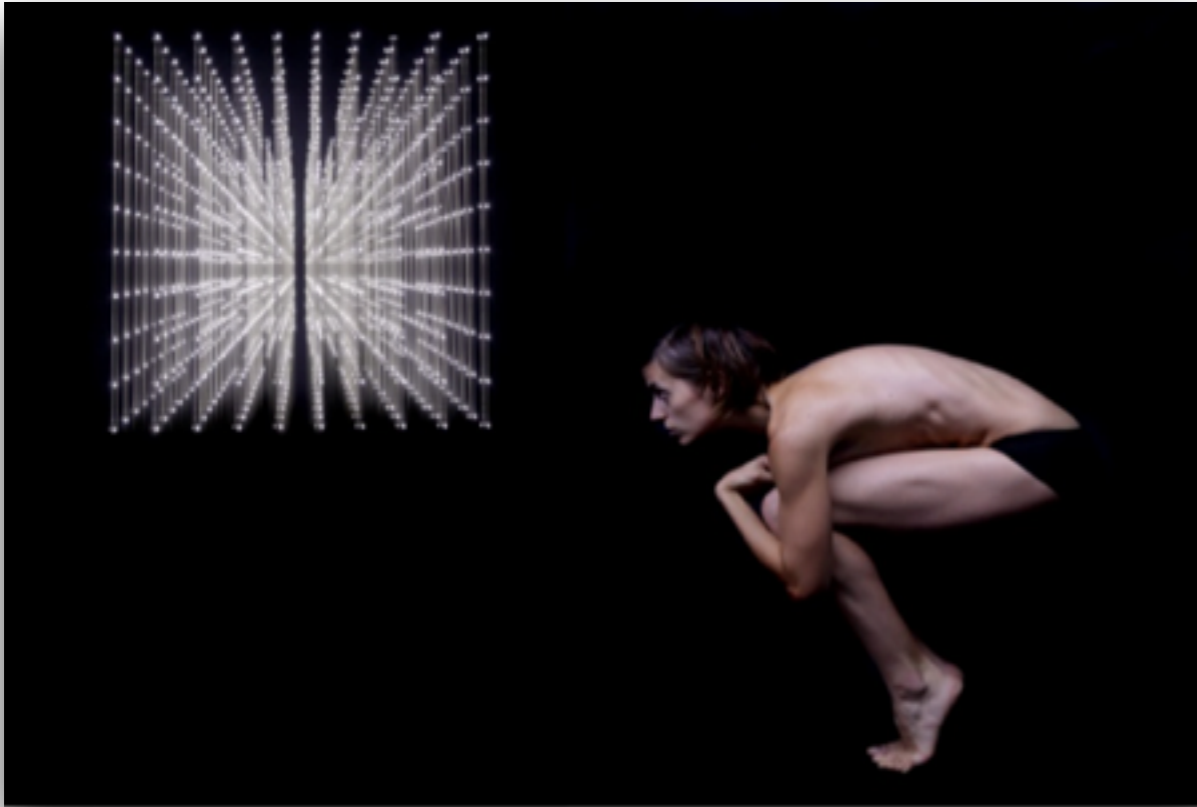

Dance is made up of lines, points, and volumes.
The dancer is not just a foreign body to the space,
but it is part of it.

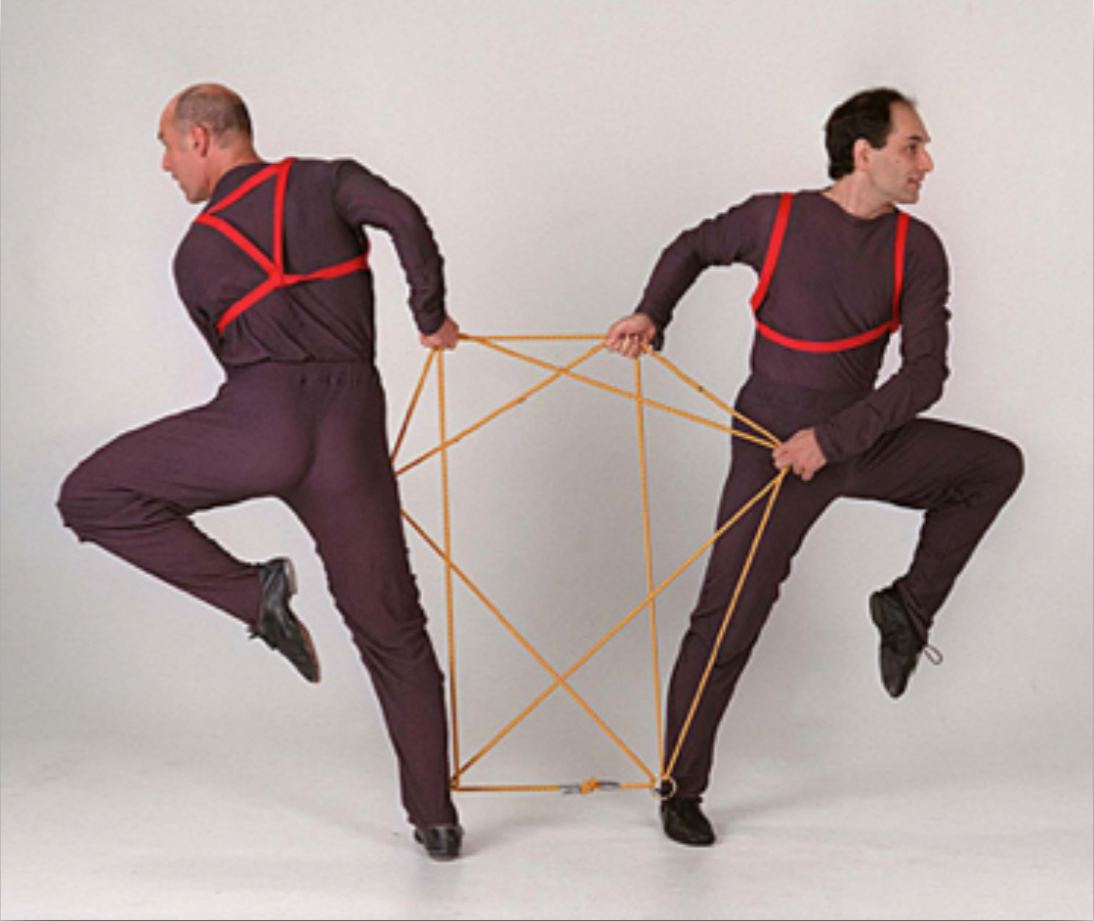

Every step, every combination of movements, from the simplest to the most complex, should celebrate this fusion between the human body and the environment.

Only when you are aware of its importance in space,
every gesture becomes dance.

Wayne McGregor

Karl Schaffer & Erik Stern

intrecci

Identity

Music and Text: "Delirio matematico"
Stefano Bruno and Marcello Ciampa

who is the mathematician?

Phi

Music: Knee n°5 (Einstein on the beach)
Philip Glass e Robert Wilson

symmetries, golden section,
numerical sequences

Music: Body Percussion
The percussion show

transformations,
modular arithmetic

Music: Methamorfosis 1
Philip Glass

knots and braids,
inverse functions

The body has a leading role in the educational process: is the mediator of the knowledge and the first actor of the communication.

Scuola dell'Infanzia di Serravalle del Chienti

sobre ruedas

Quando qualcuno vi chiede
a cosa serve la matematica,

harmonies and symmetries

play with bodies, find out all the proportions and the symmetries.

Materials:
plexiglas mirrors;
images;
red and white tape;
musics;

points and lines

find the concept of lines and point and geometric transformations on the space around our body

Materials:

- beaks made of paper;
- colors;
- musics;

knots and braids

play with the concept of knots and braids

Materials:

- ropes

conclusions

grazie ;)
