Origin of the Universe & Universal Sciences

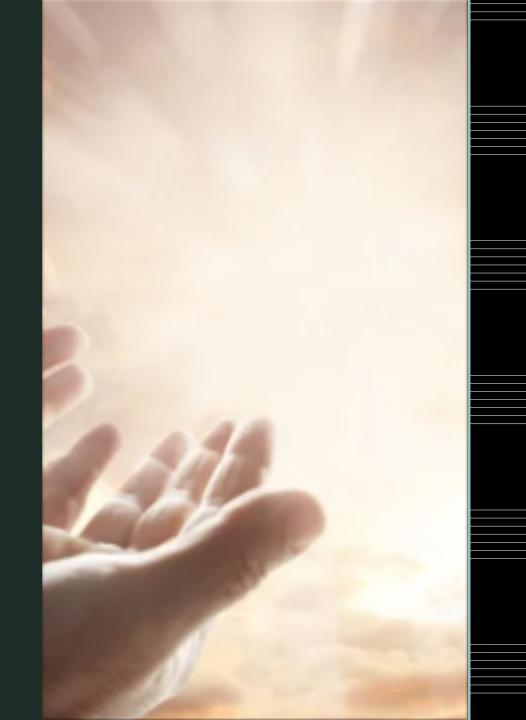

The most profound & extraordinary scientific content that has ever been unveiled.

Diyasen University, Sri Lanka

Universe's Origin

- **□** *Immense wisdom*
- □ No matter or mind.
- □ Purest state of the Universe.
- □ Vacuum. No obstacles.
- Originated a boundless time ago.
- ☐ Exists at an infinite distance away from us.

Can we go to the Universe's Origin?

Certainly!

✓ NOT by a spaceship.

✓ NOT using telescope data.

✓ NOT through scientific hypothesis or mathematical models.

> Only through extraordinary wisdom.

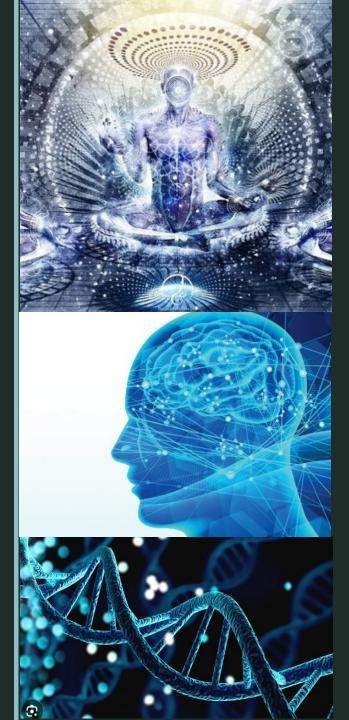

Universal Sciences

First established plans/theories/ methodology/ wisdom for all creations.

First creations are eternal & non-physical.

Physical creations are transient & originated after nonphysical creations.

Why...... Origin of the Universe & Universal Sciences?

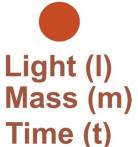

- Connect directly with the universe's boundless energy & wisdom.
- Awakening the brain & genes.
- Time travelling.
- Universe travelling.
- Cutting-edge technology.
- Eternity.
- Food & shelter for everyone.
- Preventing diseases.

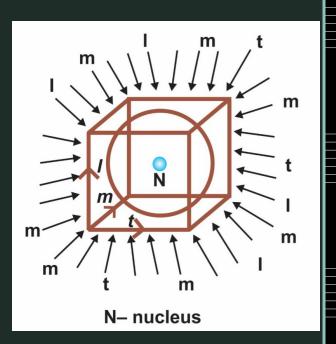

Origin of the Universe

- 1. Figuring Out the Universe's Origin
 - 1.1 Absolute Definitions of Light, Mass & Time
 - 1.2 Our Experience with Light, Mass & Time

2. The Force Cube / Energy Cube

Universe's Origin

1. Figuring out the universe's origin

Universe's Origin Light (I) Mass (m) Time (t)

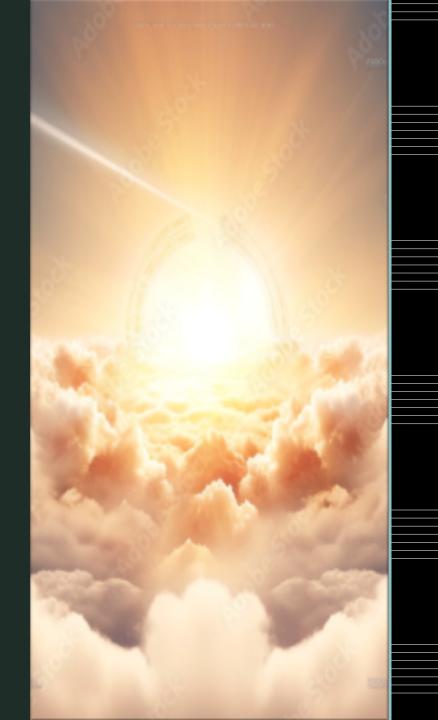

- ☐ Light, Mass & Time, exist as forces. exist as single creations.
- □ Vacuum.
- ☐ Everlasting.
- □ No Sun, moon, matter, mind, atmosphere, movement, space, directions, consciousness, density, sky, or colours.

1.1 Absolute Definition- Light

Light represents perfectness/ completeness.

Characteristics of Light

- Not traveling.
- Purest light.
- Most powerful light.
- Not produced by any sun or moon.

1.1 - Absolute Definition- Time

Time is a framework. It cannot make itself visible. Light completes time.

Characteristics

- o Doesn't elapse.
- Time has stopped and exists.
- o Everlasting. Hence, it's not measurable.
- Not originated due to Earth's or sun's rotation.

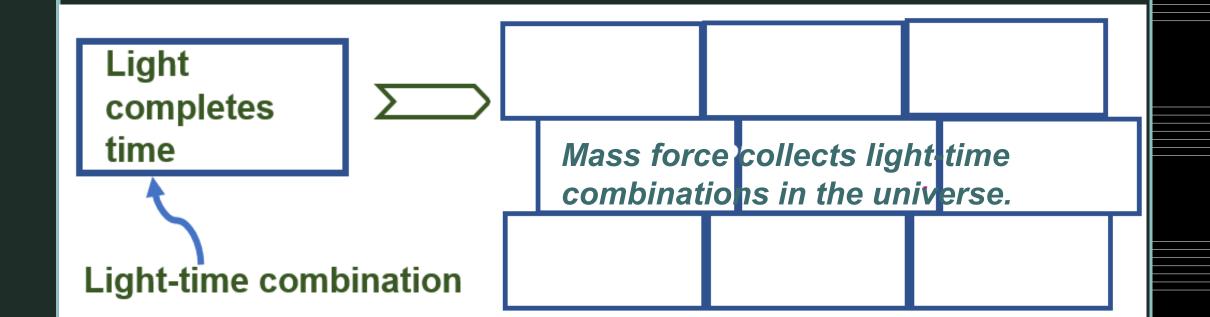

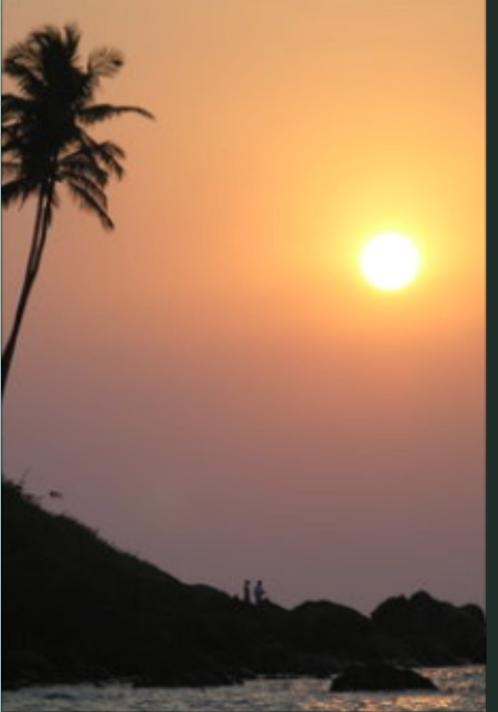

1.1 Absolute Definition - Mass

Mass can assemble or collect things in the universe.

Characteristics

> It assembles/ collects light-time combinations .

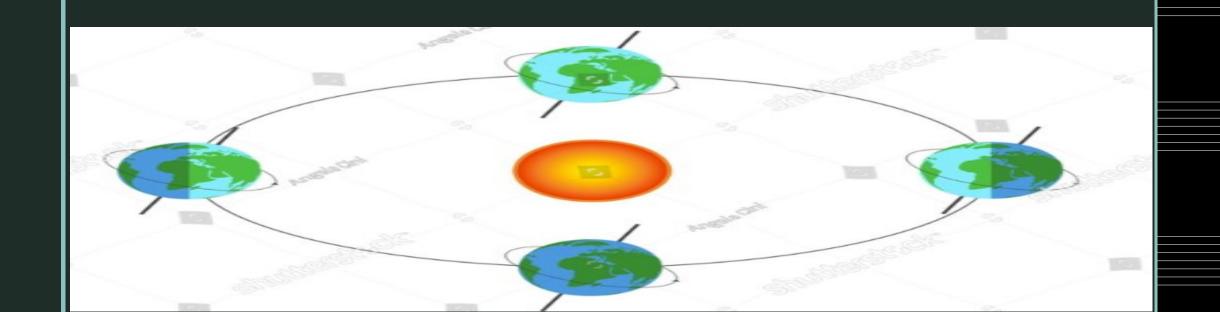

1.2 Our Experience with Light

- > Travels.
- Produced by a source.
- Depend on a source.
- Can be blocked.

1.2 Our Experience with Time

- Elapses.
- Does not exist.
- Caused by the earth's rotation around the sun.

1.2 Our Experience with Mass

- ☐ Growing masses.
- ☐ Transient.
- □ Death.

Mass represents the growth.

Mass represents the growth.

Growth: Growing plants taller & bigger, Flowering (Mass)

Morning, Days, weeks, months & years pass (Time)

Sun rises (Light)

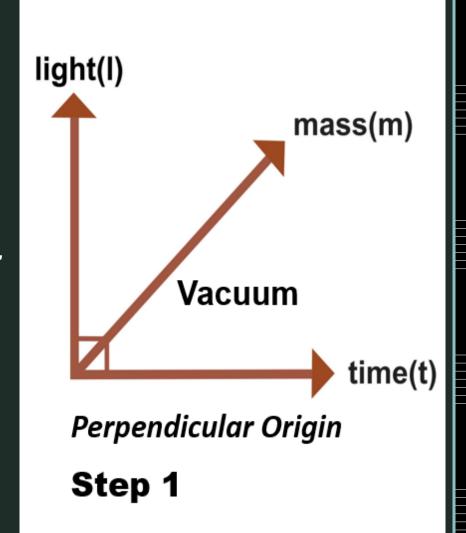

2. The Force Cube / Energy Cube

2.1 Creating the Force Cube

Light, mass & Time,

- ☐ Arrange in 3 perpendicular planes.
- ☐ Go to an independent existence.
- □ Exists over an infinite time.....

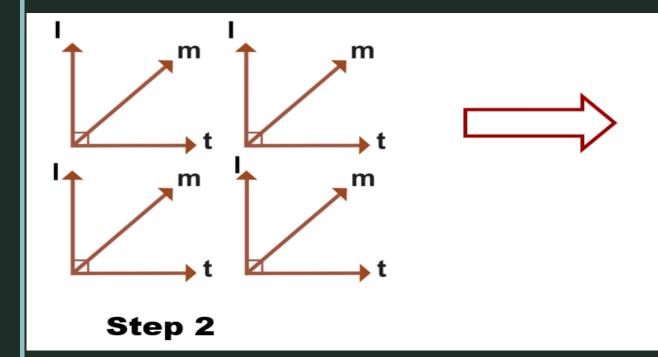

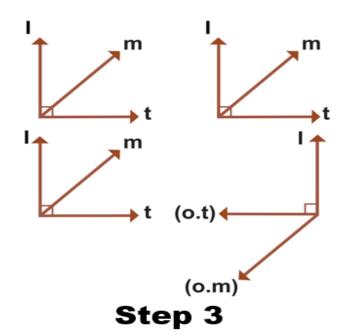

After a boundless time.....

 Creating many identical perpendicular arrangements.

 One perpendicular arrangement rotates & creates an opposite origin.

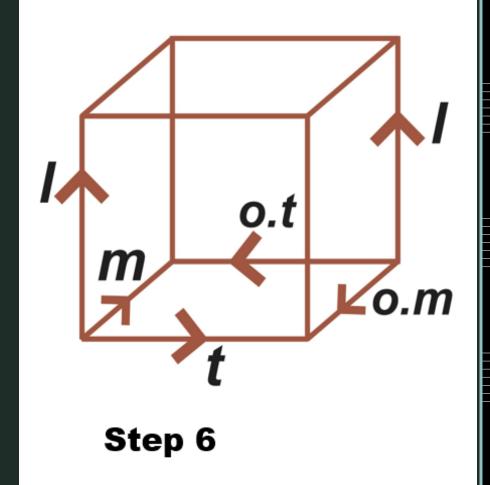

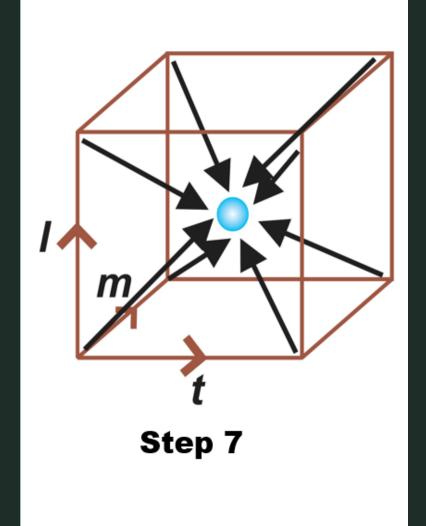

Joining the perpendicular arrangement & opposite arrangement.

Creating the Force Cube / Energy Cube

- Origin of the 3-D world.
- Supreme arrangement of 3 things in the universe.

Creating the Nucleus Within the Force Cube

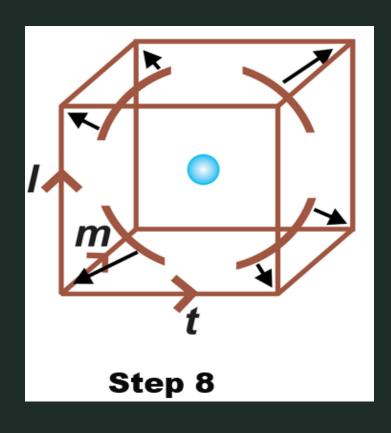

- > Nucleus attracts 8 vertices.
- > Vertices do not collapse onto the nucleus.

Force cube exists

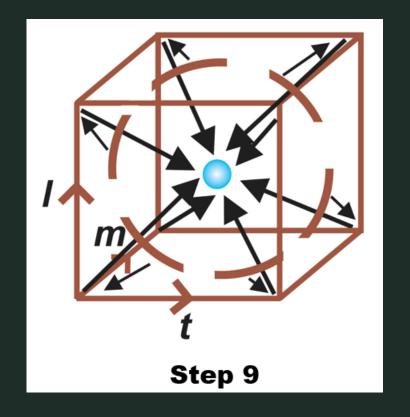

Nucleus exists

Vertices Attract Curves.

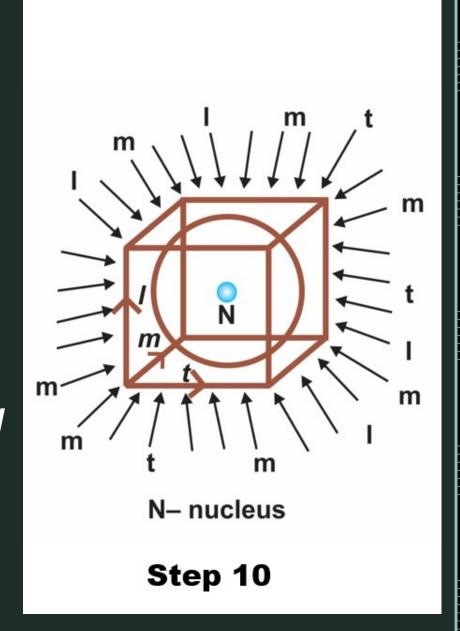

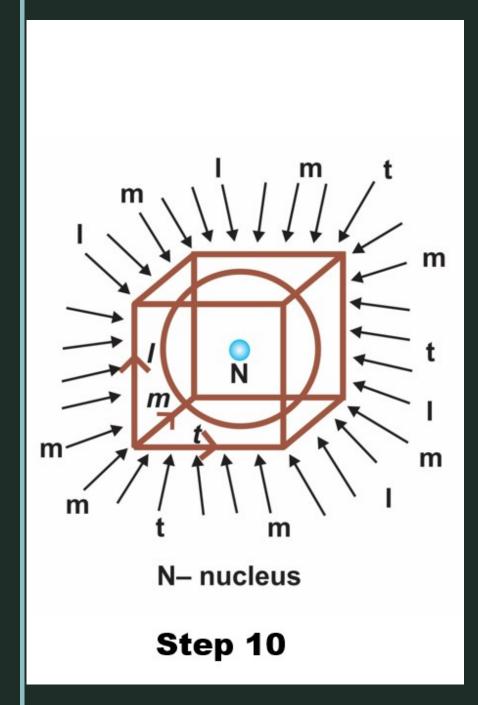

Two Forces Act at each Vertex.

Creating the Sphere Surface

- Sixteen forces create a rotating sphere surface.
- Nucleus attracts outside light, mass & time.
- Light, mass & time cannot go beyond the sphere surface.
- They spread over the surface.

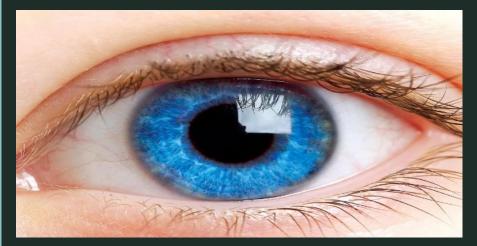

Creating the Sphere Surface

- The rotation makes the surface extremely smooth, thinner, polished, shiny & sticky.
- It can attract more & more light, mass & time.
- It gains extreme absorption ability.
- The surface senses some impulse.
- Origin of genes, sensitivity & libido.

Characteristics of Genes

- Smoothness & roughness.
- Taller & shorter.
- Intelligence.
- Skin colour.

Genes

The eye has a glossy surface to attract light without distorting.

• Fruit's peels are shiny & smooth.

 Plant leaves are waxy or shiny to attract light for photosynthesis.

Summary

This is the most profound & supreme content that surpasses all existing sciences, covering the universe's entire creation.

The opportunity to learn the ultimate truth about the universe comes once in billions of years because its content is boundless & profound.

Explore, Understand & Experience the boundless wisdom!

Special thanks to the honourable spiritual teacher Ven. Gngnānavijaya Thero for guiding me to explore and experience supreme wisdom and his encouragement to disseminate this precious content.
