

# TITLE & UNIVERSITY

## Digital Transformation in Science and Higher Education: A Multi-Method Study of the Caucasus Context

**Nino Karkadze**

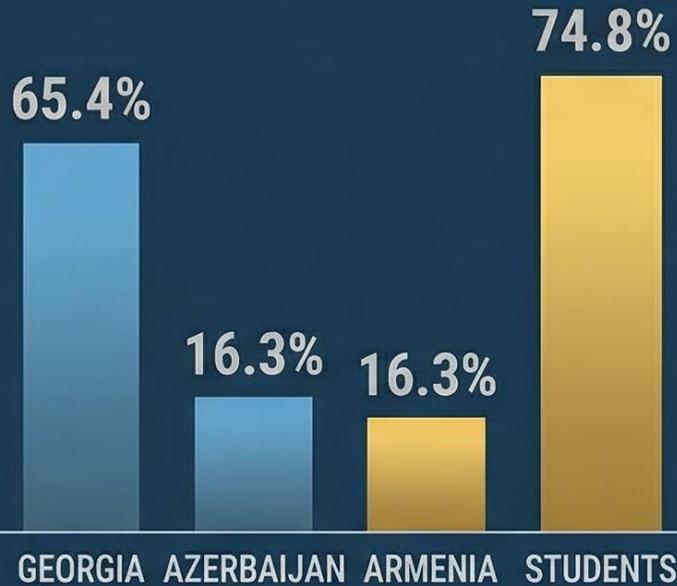

Samtskhe-Javakheti State University, Georgia

# METHODOLOGY OVERVIEW

A Multi-Method Approach (Quantitative + Qualitative)

## Quantitative Data:

1,146 Respondents

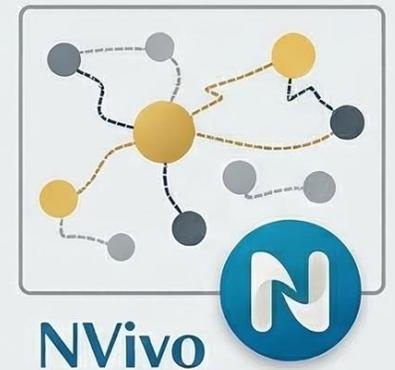

## Qualitative Insights:

24 Semi-structured Interviews

“ Findings reveal a significant openness – underscoring. ”

“ Thematic map, stretching mivan impvoitan, based on any thematic – Thematic map. ”

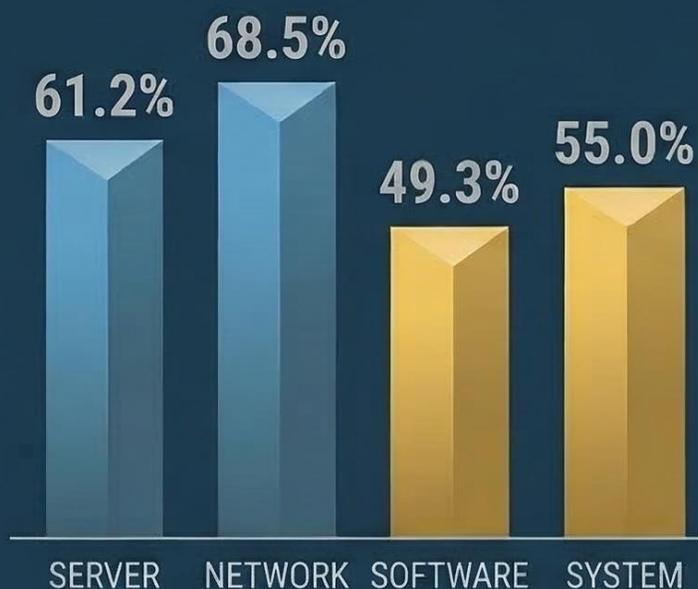

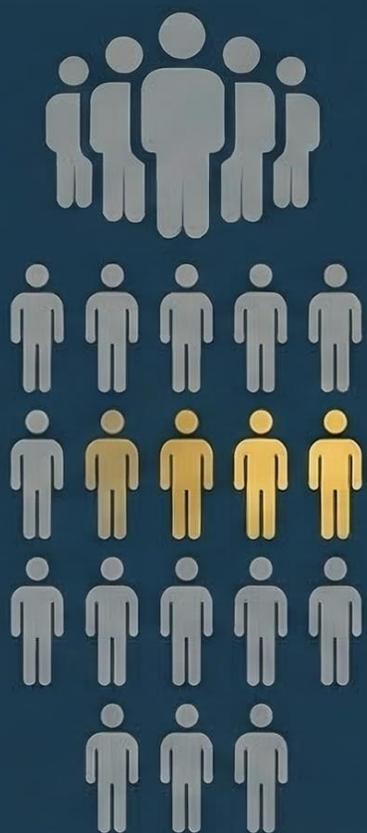

# INFRASTRUCTURE SATISFACTION (3.29/5.00)

## TRAINING PROGRAM EVALUATION (3.20/5.00)

### Quantitative Data:

1,146 Respondents

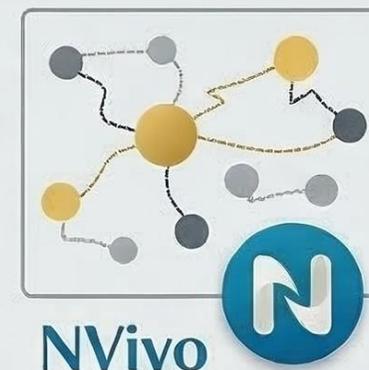

### Qualitative Insights:

18 In-depth Participant Feedback Sessions

“Participant Training Feedback”

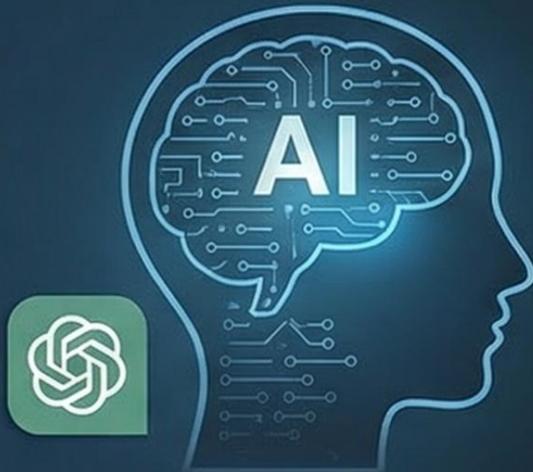

“Key focus was placed on enhancing training program content and expanding practical application”

# THE AI PARADOX

AI as a Cognitive Partner vs. A Threat

## AI Adoption for Science

61.0%

Bottom-Up Adopters

## Institutional Resistance

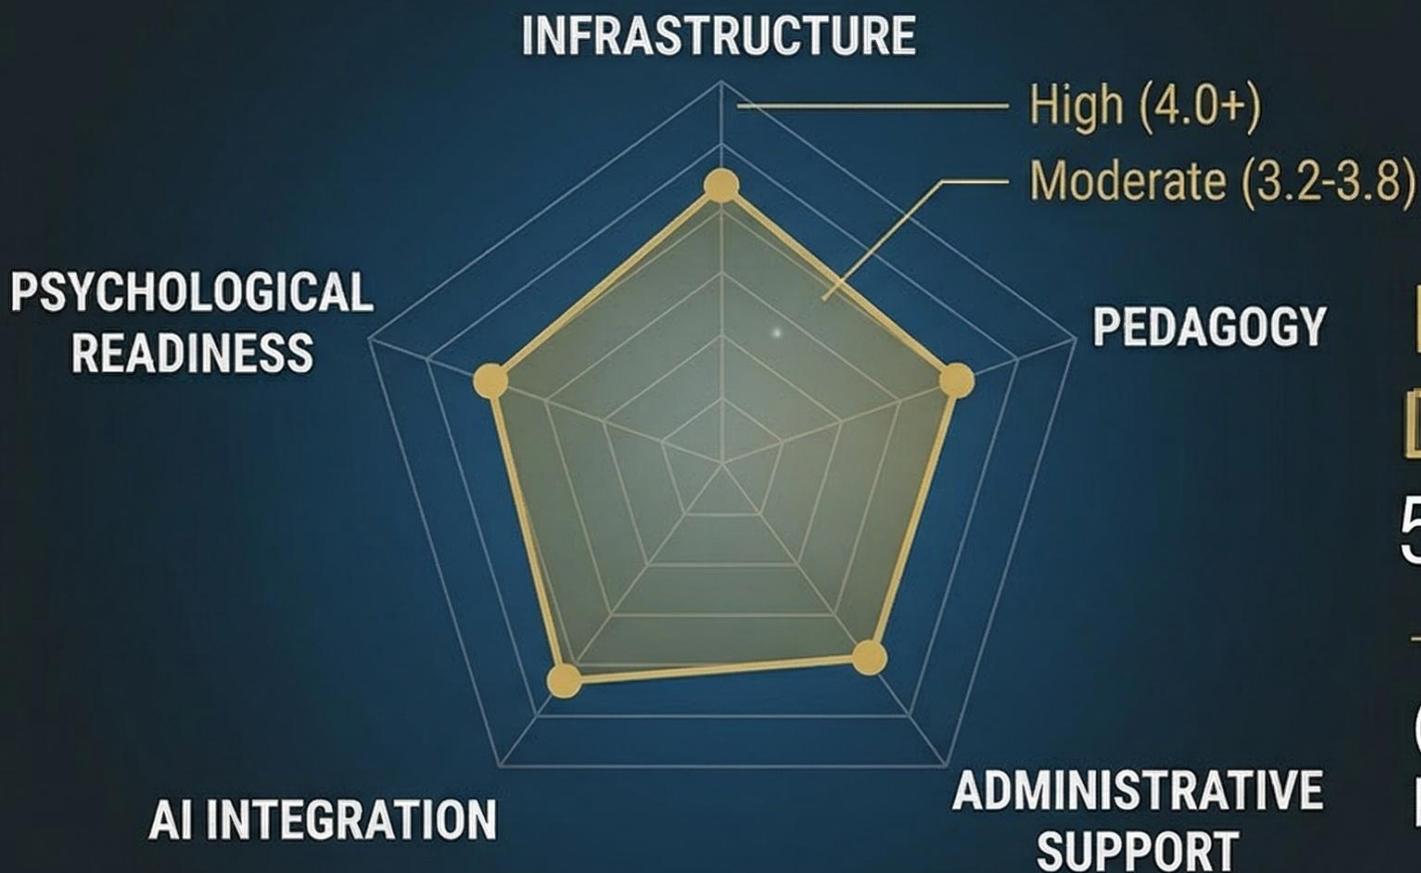

Unregulated  
Critical Thinking  
Plagiarism  
Unregulated

Top-downskeptics

TRANSITIONARY  
FRICTION

# DIGITAL MATURITY ASSESSMENT

## Measuring Institutional Digital Evolution across 5 Dimensions

(Mean Scores: Infrastructure 3.29, Pedagogy 3.31)

# EDUCATIONAL PLATFORMS USABILITY

**MOODLE**

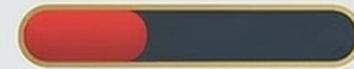

**ZOOM**

**MS TEAMS**

High Proficiency for Moodle,  
Zoom, & Teams (52.2% User  
Proficiency)

**Persistent Technical Barriers**  
(32.3% for Authentication/Stability)

**Mean Score: 3.31/5.00**

# EDUCATIONAL PLATFORMS USABILITY

MOODLE

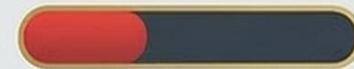

ZOOM

MS TEAMS

High Proficiency for Moodle,  
Zoom, & Teams (52.2% User  
Proficiency)

**Persistent Technical Barriers**  
(32.3% for Authentication/Stability)

**Mean Score: 3.31/5.00**

# ACCESS TO SCIENTIFIC DATABASES

**54.5%**

Active Access to  
Scopus/ScienceDirect

Highest Satisfaction Area  
(Mean Score: 3.37)

**VPN**

Access Solutions  
(Mean Score 3.37)

# THE STRATEGIC-EXECUTION GAP (NVivo Analysis)

**Digital Strategy:**  
Top-Down Commitment  
(Rectors & IT Heads)

**STUCK**

**Operational Friction:**  
Lack of Middle  
Management

Disconnect between high  
technology investment and  
low human capital training.

**Actual Implementation:** Classroom Reality

# STEM EDUCATION TRANSFORMATION

## From Labs to Technology-Enhanced Environments

### Physical Science Lab

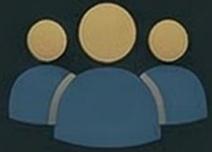

- Transitioning traditional science environments to digital.
- Focus on student engagement via simulations.
- Empirical validation of learning outcomes.

### STEM Student Engagement Impact: Measured

Found a significant increase in STEM adoption among faculty (from 15% to 61%).

# GENERATION Z vs. FACULTY

## Digital Proficiency Gap

**Z Generation**  
(Students)

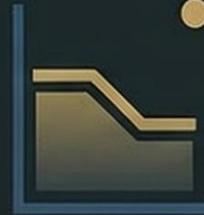

**Senior Faculty**  
Member

- **Reported:** Increased proficiency and reliance on digital tools.

- **Reported:** Digital adoption anxiety and resistance to new methods.

- **Shared Insight:** Need for specialized pedagogical training for all cohorts.

# REGIONAL vs. METROPOLITAN BARRIERS

## Localized Digital Evolution in the Caucasus

**Samtskhe-Javakheti State University, Georgia (SJSU)**

**54.5%** Infrastructure Satisfaction  
(Mean: 3.29/5.00)

Specific resource gaps in regional HEIs

Access solutions  
(VPN / Scopus / ScienceDirect)

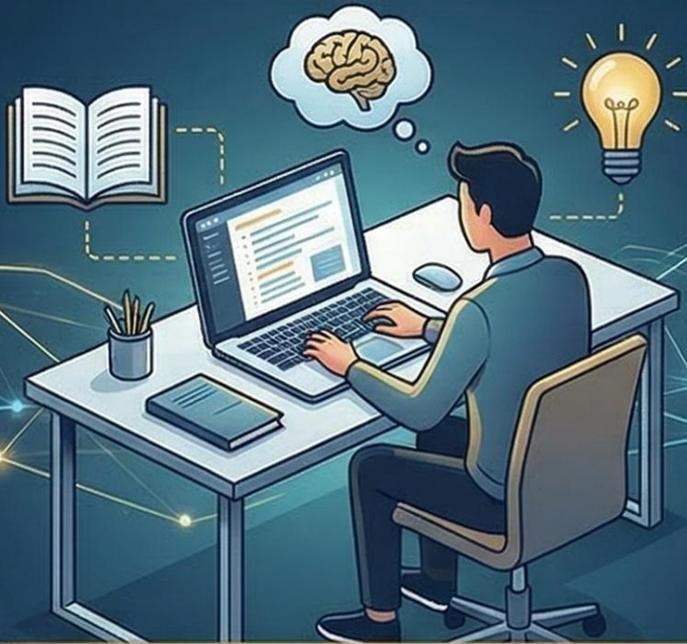

Specific resource gaps in regional HEIs

**SJSUs as a Case Study: Bridging the Divide**

- Technology is a tool, not a substitute for pedagogy.
- Found a significant increase in STEM adoption among faculty (from 15% to 61%).
- Disconnect between high technology investment and low human capital training.

# DIGITAL LITERACY & PEDAGOGY

## Beyond Hardware: The Role of Digital Literacy

**Self-Assessments: Need for critical skill reinforcement**

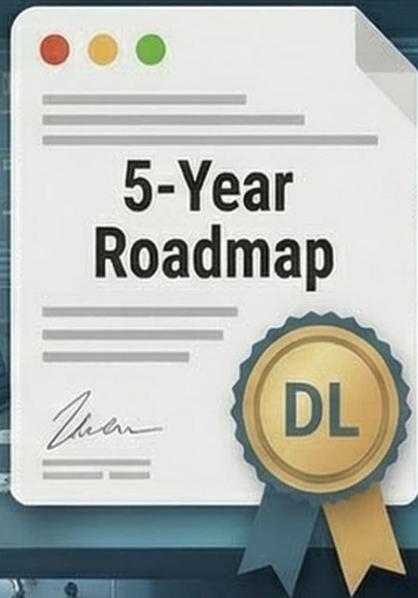

- Technology is a tool, not a substitute for pedagogy.

 **Access solutions**     
Certifications / Competency Frameworks / Digital Modules

- Shift from passive learning to digital exploration.
- Disconnect between high technology investment and low human capital training.
- Core competency for modern researchers.

# THE STRATEGIC LEAP (Policy Analysis)

## OPERATIONALIZING THE DIGITAL VISION

### Key Points

- Bridging the gap from policy to implementation.
- Need for dedicated Digital Transformation Officers.
- Investing in sustained human capital development (Training Mean: 3.20).

# AI ETHICS & GOVERNANCE

## ESTABLISHING CLEAR INSTITUTIONAL AI GUIDELINES.

### Key Points

- Creating AI Ethics Commit for academic integrity.
- AI as a Cognitive Partner vs. A Plagiarism Tool.
- Regulatory frameworks to address unregulated usage.

# INNOVATION HUB: THE 'EDUXCELL' INITIATIVE

PROPOSING A CENTRAL FOR DIGITAL EXCELLENCE (EduXcell).

## Key Points

- Targeted support for specialized pedagogical training (STEM).
- Fostering continuous research & development.
- Ensuring sustainable funding for digital ecosystems.

## RESEARCH SUSTAINABILITY MODEL

### Fostering Long-Term Research & Development

Samskhe Javakheti State University, Georgia

#### Key Points

- Investing in continuous human capital development.
- Targeted support for specialized pedagogical training (STEM).
- Fostering continuous research & development.
- Ensuring sustainable funding for digital ecosystems.

### Regional & Cross-Border Collaboration for Success

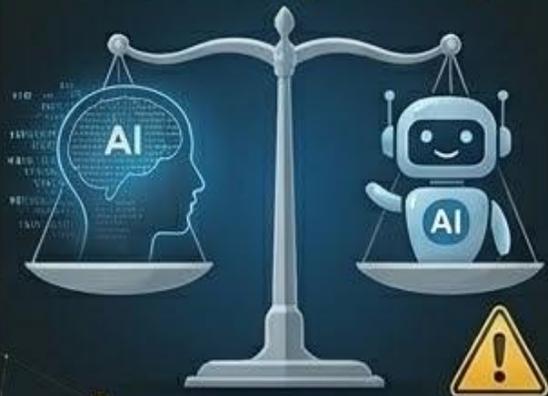

#### Key Points

- Establishing joint digital initiatives (e.g., Caucasus Digital Hub).
- Fostering continuous research & development across nations.
- Addressing localized resource gaps.
- Fostering regional digital equity.

## AI & PEDAGOGY TRANSFORMATION

### Revolutionizing Teaching Methods (AI Pedagogy)

#### Key Points

- Integrating generative AI as a cognitive partner.
- Targeted support for specialized pedagogical training (STEM).
- Developing continuous research & development.
- Shifting from passive learning to digital exploration.

## FUTURE OUTLOOK & CAKE-TO-ACTION

### FUTURE ROADMAP: Digital Transformation as an Ongoing Journey.

#### Key Points

- Longitudinal study on digital literacy & employability.
- Measuring continuous research & development.
- Ensuring sustainable funding for digital ecosystems.
- Technology empowers, but people transform.
