Abstract

E- Learning represents an innovative shift in the field of learning, providing rapid access to specific knowledge and information. It offers online instruction that can be delivered anytime and anywhere through a wide range of electronic learning solutions such as Web-based courseware, online discussion groups, live virtual classes, video and audio streaming, Web chat, online simulations, and virtual mentoring. As an attempt to ease the teaching of English to international students in University Malaysia Perlis (UniMAP), the language instructors have integrated the use of eLearning tool in their daily classrooms, blended with the face to face interaction. This paper provides an overview of the effects of using eLearning language courseware towards the English language performances of 35 international students who are currently enrolled in Intensive English Course in University Malaysia Perlis.
