Martina König, MA studied English and French at Karl-Franzens University Graz, focusing on computational (esp. corpus) linguistics and e-learning. Her master thesis "EFL e-learning platforms. The linguistic, methodological and technical state of the art", combining these two interests, was part of the language server project at Karl-Franzens University Graz. She worked as ao. Univ.-Prof. Dr. Bernhard Kettemann's tutor at the English Department, organized conferences and workshops and also co-authored two articles then.

Her research interests include e-learning, semiotics and usability, focusing on John Maeda's elaborations on simplicity vs. complexity. She completed the "train-the-trainer" courses to gain the certificate to be a professional e-trainer. Her 7 publications to date include articles on e-learning as well as morphology or computational language analysis. She regularly takes part in national as well as international conferences (e.g. IATEFL, ICBLC, etc.) to constantly broaden her knowledge. Additionally, she holds seminars in teacher training and adult education.

Currently, she teaches English at the University of Applied Sciences, FH JOANNEUM Graz, at the Department of Information Design. Her English language courses are specially tailored to the needs of information designers.
