Slavi Stoyanov is senior research fellow at the Centre for Learning Sciences and Technologies at the Open University of the Netherlands. He holds a PhD degree in instructional technology from the University of Twente, the Netherlands. His areas of expertise include technology enhanced learning, instructional design, group concept mapping, software design and evaluation, and individual differences in learning and problem solving. Slavi Stoyanov is senior member of both the Dutch Research School on Education and Training (ICO) and the Dutch Research School on Computer Science (SIKS). He is visiting lecturer at the Computer Science department of the Sofia University and at the Educational Science department of the Free University of Brussels. He serves also as reviewer of the journals Educational Technology & Society, Computers in Human Behavior and Web-Based Communities, and he is in the programme committees of seven scientific conferences in the field of technology enhanced learning.
