Jose F. Quesada is co-founder and CTO of Milao Language Inc.

He graduated in Philosophy in 1992 from the University of Granada and received a PhD in Computer Science in 1997 from the University of Seville. He has worked as an Associate Professor at the Department of Computer Science and Artificial Intelligence at the University of Seville, and he is currently working as a senior technical consultant at the High-Performance Computing Center of Andalucia in Spain.

His research concerns mainly Natural Language Engineering, and specifically the interrelation between logics, linguistics, computer science and bio- and psychologically motivated models of language and mind. During the last 20 years he has focused his work and research on the field of Natural Language Engineering, having participated in several EU funded Research and Development projects.

Between 2005 and 2012 he has been the research director of Natural Language, a company from the Vocalcom group, where he was in charge of the design and implementation of the kernel of a complete Natural Language-oriented system, having taken part as an independent evaluator in the recent EU call 10 of the EU 7th Framework Program on Language Technologies.

He has published over 50 articles in different journals and conferences and has given numerous lectures and tutorials for academic and industrial audiences.
