

Maria Maddalena Carnasciali

**University of Genoa
Genova, Italy**

Member of the Conference Scientific Committee

Marilena Carnasciali is the scientific coordinator of the "Chemistry Is All Around Network" Project. Graduated in Chemistry in 1980 she develops the study of different subjects related to the Physic Chemistry, as Rare Earth, High Temperature Superconductors (HTSC), X-ray structures determination and micro Raman spectroscopy.

From 1998 to 2009 she is the Dean's delegate for the Orientation to the University Studies of the Faculty of Science in the Athenaeum Committee. She participates to the annual organization of important meetings about the orientation of school students and is involved in the organization of several scientific seminars in high school education degree as Faculty representative. She coordinates the science group in the "GLUES" project (School And University Work Group), where university and school teachers works together.

She is member of the organizing committee of the international event "X_Science" (<http://www.xscience.it/contatti.htm>).

Since 2007 she is member of the managerial group of the Division of Chemical Educational of Italian Chemical Society and is involved in the National Plane "Teaching Experimental Sciences".

Since 2008 she is the Chancellor's delegate and is the president of Orientation Committee of the University of Genoa and she works together the Regional Scholastic Office to promote the collaboration between School and University.

In 2009, she participates, both as organizer and as a teacher, to the realization of the first edition of the Chemical Didactic and Educational Research Summer School "Ulderico Segre", performed in Urbino from 12th to 18th July.

In the period 1st March 2010 - 28th February 2011 she is the scientific coordinator of European project "Chemistry Is All Around Us" Project 2009-5153/ 167126-LLP-1-2009-1-IT-KA1-KA1ECETB approved by EACEA with a score of 8,5/10.

In 2010 she is the referent for Liguria of the "Scientific Degree" National Plane_ CHEMISTRY 2010-2012.

In 2011 wins the second European project , with a duration of three years, entitled "Chemistry Is All Around Network" Project, 518300-LLP-1-2011-1-IT-COMENIUS-CNW.
