Web: http://www.cs.pdx.edu/~ktoth/

Kal Toth is the Executive Director of the Oregon Master of Software Engineering Program and Associate Professor in the Department of Computer Science, Maseeh College of Engineering, Portland State University. He holds a Ph.D. in Electrical Engineering (1980), as well as a masters and a bachelors degree in engineering from Carleton University, Ottawa, Canada. He is a Professional Engineer with a software engineering designation.

Kal has developed and delivered online ["e-learning"] courses to working professionals for about 15 years. He has been a faculty member of the University of British Columbia, Simon Fraser University, Oregon State University, and Portland State University; and has taught courses in Software Project Management, Software Quality Engineering, Software Estimating, database systems, e-commerce, programming, and professional software engineering issues. He has also delivered seminars in the fields of software security, and identity management. Dr. Toth's primary areas of research and scholarly work are in the areas of identity management, online education, and software estimating.

He has held leadership positions in industry for about 20 years with Intellitech Canada Limited (President), The CGI Group (Vice President Total Quality), Hughes Aircraft of Canada (Director, Quality), Datalink Systems Corp. (Vice President Engineering); and has also consulted with various firms including numerous Canadian government departments (National Defence, Communications, Transportation, and External Affairs). His technical competencies have been in the fields of information security, distributed database systems, packet networks, and e-commerce.
