Jerneja Križan works as an independent researcher in the International Centre for Ecoremediations at the Faculty of Arts in Maribor.

She graduated in English and Geography from the Faculty of Arts at the University of Maribor in 2010. Since then she has been employed in the International Centre for Ecoremediations, where she works in the field of Sustainable Geography and Education.

So far Jerneja Križan has been involved in two European Union and Ministry for Education funded projects. First was called Nature's Classroom, the second is called Establishment of the Conditions for the Experiential Learning for Sustainable Development.

Jerneja Križan works as a teacher educator in the field of Experiential Learning for Sustainable Development, where she presents new, methods and Ecoremediation Techniques in the new Teaching Polygon in Slovenia.

She is also involved as external educator in the water and soil quality assessments for educational purposes.
