**Web:** <http://www.linkedin.com/in/ralimisi>

Rene Alimisi is a Computer Engineer with a focus on educational technology. She works in the field of Information and Communication Technologies in Education, where her main research interests are in the design and evaluation of learning interventions that facilitate the idea of 'constructionism' and encourage the development of computational thinking skills. Rene Alimisi is also interested in the educational use of digital video production for the creation of narratives.

Rene Alimisi is a perspective PhD student. She holds a Master with distinction in Information Communication Technology in Education (2009) from the University of London, Institute of Education and a Diploma (5 years studies) in Computer Engineering and Telecommunications (2008) from the University of Thessaly, Volos. She has attended numerous seminars and has taken actively part in international workshops in the University of London, London Knowledge lab and University of Thessaly concerning ICT in Education. She is currently working as an Educational Software Engineer in CERETETH (Centre for Research and Technology Thessaly)
