### **Abstract**

Both history of mathematics and education of mathematics is old subject. This question arise that can these two important subject can help each other or not unfortunately this idea made mathematics society into two group one have idea that History of mathematics can help education of mathematics other group have idea that not only history of mathematics can not help education of mathematics but also it make some confusion.

In this article I am going to do some comparison and take some conclusion that history of mathematics can make education of mathematics so active and interesting.
