Abstract

E-learning though not new in Nigeria has been given much prominence of recent. Many Nigerians have benefited through the open education (correspondence) of rapid college and exams' success correspondence college (Yusuf 2006). E-learning considering its advantages, is geared towards the betterment of education. Thus e-learning has continued to grow at an unprecedented rate in Nigeria Institutions of learning but with a lot challenges. This paper therefore considered the concept of e-learning, origin of e-learning in Nigeria, advantages and disadvantages of e-learning, challenges of e-learning in Nigeria tertiary institutions and finally the study recommended among others that university administration should go into public and private partnership such as the one presently existing with Afrihub, and also form a consortium to purchase bandwidth among others for the success of e-learning in Nigeria tertiary institutions.
