

Gender Equality at University: Evidence From IRIS Survey

Antonella Bonfà, Michela Freddano

University of Genova

Genova / Italia

bonfa@unige.it

michela.freddano@unige.it

IRIS is

an indicator for measuring
students' performance in
learning process during
their 1st year of
University

IRIS

IRIS takes into account both the **effectiveness**, and the **efficiency** of the process.

- **Effectiveness** is the rating obtained in the first year
- **Efficiency** represents the number of credits earned in the 1st year.

IRIS value

is obtained by calculating the **ratio** between **what the student has really done** (in terms of marks and credits earned) and **how much he could have done** if he had passed all his curriculum exams with the highest ratings(60CFU* \times 31**)

$$\text{IRIS} = \frac{\sum_1^n V_i \cdot \text{CFU}_i}{1,860} \cdot 100$$

*standard value
CFU/year

**31=30 cum
laude

IRIS trends

“female students are more successful than their male colleagues”.

The *cross-sectional* survey covered **19.555** freshmen of University of Genova belonging to 4 Academic Years

'04-'05; '05-'06; '06-07; '07-'08; '09-'10

IRIS

Not only a numerical
supremacy of females:
55% vs **45%** males, but
also academic:

IRIS_f = 41 vs **IRIS_m = 34**

IRIS

Supremacy that occurs not only in humanities Faculties, but also in the in technical / scientific ones just like **Sciences** and **Engineering** where the girls are only 31%.

The problem

To show their
superiority in the
technical / scientific
Faculties, girls must
first prove their
"courage" to enter and
overcome hard
stereotypes

The problem

Old stereotypes which still:

- influence educational choices
- cause a gender segregation in the labour market
- an underrepresentation in crucial and well-paid professional sectors

IRIS

....so, males avoid certain disciplines, considering them too feminised

IRIS

**... while girls are convinced
to be not up to some
Faculties**

IRIS: a focus by gender

In this gender survey, IRIS
confirms a well known fact

So it is an

accurate indicator

of the learning process performance ...

IRIS

... and it aims to assess the effectiveness of the actions that the Parties concerned (schools, university, families) decide to carry out for improving learning.

Participants

A.Y. 2009/2010

- **5,048 'pure matriculated'** at University of Genova
- **56% are female gender**
- **into 5 university Schools**

Method

- **Comparative evaluation** per gender and type of university Schools
- **Topic:** the *performances* of pure matriculated students in A.Y. 2009/2010
- **Data** provided by the Statistical Office of the University of Genova
- **Analysis** (descriptive, correlation, regression)

% freshmen A.Y. 2009/2010

IRIS = 0 per Schools and gender

	Math, Physical and Natural Science	Medical and Pharmaceutical Sciences	Social Sciences	Humanities	Polytechnic	Total
Males	27.4	19.7	23.7	25.2	23.6	23.3
Females	23.4	10.4	14.5	14.8	10.1	13.8

Coefficient of the correlation between diploma and academic performances per Schools and per gender

	Males	Females	Total	Distance Males - Females
Math, Physical and Natural Science	0.501	0.313	0.413	0.188
Medical and Pharmaceutical Sciences	0.466	0.368	0.412	0.098
Social Sciences	0.494	0.502	0.510	-0.008
Humanities	0.416	0.465	0.457	-0.049
Polytechnic	0.419	0.330	0.401	0.089

(correlation are significant at p-value <0,001)

A regression model: gender by School

	Math, Physical and Natural Science	Medical and Pharmaceutical Sciences	Social Sciences	Humanities	Polytechnic	Total
(Costant)	-8.79	-12.57*	-24.32***	-10.15	-5.09	-16.09***
Female	-6.56*	6.21***	0.87	-5.21	7.17***	2.75***
No Genova	-4.66	1.06	-2.85**	-6.30***	-1.86	-2.60***
Technical	-13.34**	0.06	-8.44***	-14.90***	-11.54***	-8.29***
Vocational	-16.726	<u>-8.67</u>	-14.55***	-28.31***	-11.26	-14.55***
Diploma	0.74***	0.58***	0.92***	0.95***	0.62***	0.78***
% of explained variance compared to the null model	17.82	14.78	25.64	25.52	17.12	23.63%
	(male from Liceo of Genova)					

Some conclusions

Medical and Pharmaceutical Sciences & Polytechnic	Social Sciences & Humanities	Math, Physical and Natural Science
<p>IRIS=0 → more males Diploma: less predicatability for females Academic achievement: better for females</p>	<p>IRIS=0 → more males Diploma: predictability for males and females Academic achievement: gender is not significant</p>	<p>IRIS=0 → more males and females Diploma: less predicatability for males Academic achievement: better for males</p>
<p>Stronger guidance activities for males</p>	<p>Stronger guidance activities in high education and for males at the first year</p>	<p>Stronger guidance activities for all the students at the first academic year and stronger guidance for females</p>
