Dr. Allan H.K. Yuen began his career in education when he became a secondary school teacher in 1980. After ten years successful service as a teacher and subject panel chair of mathematics and computer studies, he started his career in teacher education. Dr. Yuen joined the Faculty of Education, the University of Hong Kong in 1997. He is currently Associate Professor in Information and Technology Studies and Deputy Director of the Centre for Information Technology in Education. Dr. Yuen has broad and deep experience in schooling and educational change. He has a strong background in both qualitative and quantitative research. His primary research interests focus on technology adoption and change in education at classroom, school and system level. These interests are developed in a diverse range of research areas including e-learning, pedagogical innovations, school change, social and cultural aspects of ICT use, e-leadership, students' and teachers' perception of ICT, blended and flexible learning, digital divide in education, and teacher development. Dr. Yuen has extensive experience in large-scale, international educational research projects. He has led more than 40 funded research projects focusing on the aforementioned research areas. He has over 200 publications including books, monographs, refereed journal articles, book chapters, and conference papers. Dr. Yuen presented papers at numerous academic conferences around the world. He has been making extensive contributions to the academic and professional communities such as, President of the Hong Kong Association for Educational Communications and Technology (HKAECT), Editorial Board Member of Australasian Journal of Educational Technology (AJET) and Journal of education, culture and technology.
