Elisabetta Cannova is partner of Speha Fresia since 1986 and she is member of the administration board delegated for the annual financial statement of the company.

She started her professional experience in the fields of financial analysis for micro economic studies and as trainer and consultant of administration, finance and management control for small enterprises.

Since the beginning of the 90ies the gender perspective drove her and her company in the development of integrated actions to strengthen the participation of women in the economic, social and decision-making domains (Women Enterprises Incubator).

The entrepreneurship education and the guidance to an aware and informed entrepreneurial choice are the background fields of application of the holistic and learner's centred approaches through narrative practices.

She has been working with biography method, largely exploited in very different fields, with adult learners, mainly women and people with migrant background.

She is the project coordinator of REALIZE project.

Since 2001, in the framework of the Lifelong Learning Programme, she has been involved in several projects as project manager for Speha Fresia, both as partner and as leading organisation.
