Federico Albiero is the R&D manager of EduTech and responsible of teacher training on new technologies of Computer Learning.

He graduated in Telecommunication Engineering from the University of Padova in 2006, with his M.Sc. Thesis at Aalborg University (DK). Then he worked as a researcher for VTT (FI), Create-Net (I) and Barcelona Media (S), specializing on multimedia technologies and HCI. Since 2009 he works for EduTech, adding a strong focus on educational aspects and pedagogical research (phenomenologic pedagogy), by collaborating in projects and teaching on the field.

Federico Albiero is skilled in the development of projects focused on the use of new technologies in education (training) and R&D of new applications and tools with educational aims. His research interests are cultural anthropology, storytelling, the use of narrative forms and paradigms in educational activities, drama education, art education, Jungian psychoanalysis. The focus is for both curricular activities and individual therapies on special needs.

So far Federico Albiero has been involved in EU projects and local ones. He has developed and, recently, coordinated partnerships with universities, training organizations, schools, research centers, local companies.

Federico Albiero participated as a speaker at International Conferences and wrote several scientific publications.
