

## **The Blended Classroom: How teachers can use blended and mobile learning to engage their students in exciting new ways!**

**Coles Wilkinson<sup>1</sup>**

### **Abstract**

*Developed specifically by pedagogical experts, itslearning incorporates streamlined curriculum management functionality, and focuses on proven pedagogical strategies that drive student-centered learning*

*This presentation looks at some of the possibilities offered by itslearning and shows how teachers can engage their students with exciting and rich multi-media content that can be used in the classroom, at home, and online - anytime, any device, any web-browser. Join us for a dynamic and fast-paced presentation that may open your eyes to what the future may hold.*

*Designed for educators and how they want to teach, itslearning is a “cloud-based” learning platform that connects lecturers, students and leaders of educational institutions in and outside the physical teaching environment. It gives lecturers countless ways to create engaging lessons and resources, makes sharing materials easy, and automates routine tasks so the lecturer has more time to focus on their students.*

*Keywords: blended learning, multi-media contents, teaching*
